

iM TOKENOMICS

TOKEN HOLDER

TOKEN HOLDERS HAVE 3 OPTIONS:

- 1 Stake in DEXs
Token holders will have the option of staking iM token on Plasma Finance and others to come
- 2 Stake on iM dAPP
Token holders will have the ability to stake iM directly on our dAPP which will have functionality with the iM App (Q1 2022)
- 3 Liquidity Provider on DEXs
Token holders will be able to provide liquidity in the pair of iM/Eth on multiple DEX's

Once they have chosen one or more of those options, they will receive an APR of 12-24% per year (12% for staking and 24% for Liquidity Providing)

Token Holders receive rewards daily and there is a lockup period of 72 hours

MINING AND STAKING POOLS

These pools will be generating BTC and ETH residuals that will be distributed within iM community as follows:

- 60%** Buy back iM token amongst DEXs/CEXs and then deposited into the stake pool therefore bolstering token holder staking rewards by increasing amount of staked iM.
- 30%** Reinvested back into operations such as mining facilities and staking pools.
- 9%** Reinvested into Dev Team and iM Labs.
- 1%** Given to non-profit of token holders choice via governance.
